Martyn Industrials

Transport Interior Specialists since 1986

Stylish PVC floorings are accepted as the fitment of choice for bus operators and the market leader within the UK, and indeed globally, is Gerflor with their Tarabus range, which is distributed in the UK by Martyn Industrials Ltd.

Martyn Industrials have promoted the Gerflor Tarabus Flooring range for 25 years and offer a wide range of interior trim products, including flooring, soft trim, glues, sealants, welding tools and other complementary products.

History

*Over 25 years
of Tarabus in the UK*

1980's

Martyn Industrials was formed as a partnership in 1980, by the eponymous Jim Martyn, who, together with wife Gill and her parents Lawrie and Jean Keen, were initially focusing on selling Industrial Plastics.

However, in 1986 they took on the Tarabus agency for the UK - fortuitously coinciding with the de-regulation of the bus industry which was an opportunity for the industry to look at new innovations and products.

1990's

Through the 80's and 90's Martyn Industrials visited every bus builder and operator to promote the benefits of the Tarabus flooring system. Stagecoach, with their trademark "Rouge" floors were an early convert and have used Tarabus ever since.

By the mid 90's Martyn Industrials had developed the "Tarabus System" so successfully that additional personnel had to be recruited to look after the burgeoning customer base, Gordon Keen joining the Company in 1994 followed by Mike Houston 2 years later.

Current Day

At the turn of the Millenium, many major National Operators, including Stagecoach, First Group, Travel West Midlands and the majority of London Operators, were using Tarabus as standard or approved flooring.

Martyn Industrials' success in establishing the Tarabus range as market leader in the UK is built on their strong belief in being customer focused as summed up by Mike Houston

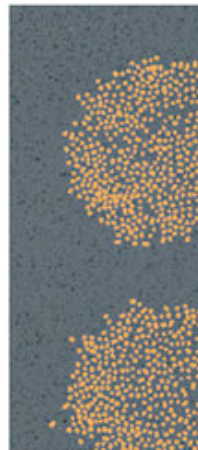

"We don't just sell our standard range of products, we find out what the customers' needs are and, if necessary, make what they want to buy."

covering supplied has quite
simply made us smile from
ear to ear!”

KFS Special Vehicles Ltd

Self adhesive available

Taraplus Small Vehicle Solutions

floor coverings for mini buses, shuttle buses and ambulances

Hard wearing

Its unique PVC composition makes TARAPLUS resistant to scratches and it will last the whole life of the vehicle (with normal use).

Health

A bacteriostatic additive in the specific formulation of TARAPLUS prevents the growth of bacteria. TARAPLUS is easy to clean and meets the hygiene requirements of even the most demanding users.

Safety

The silicium carbide particles in TARAPLUS give it the anti-slip properties required to ensure passenger safety, even on a wet floor.

Environment

15% lighter, TARAPLUS new conception.

Easy to lay

TARAPLUS new textile backing provides optimum gluing capabilities with any type of glue. In addition, its 2m width (few welds) and its flexibility make installation easy.

KIT System

For advice on the most suitable Transport Interior Solution for your specific requirements please contact us on **01228 544000**

Interior Kits

We also offer interior kit systems for wheelchair accessible minibuses, and small van or car conversions, which are cut according to your template or dimensioned drawing, and include MILTEX velour soft trim, sound insulation material, colour coordinated sealants and Tarabus or Taraplus flooring as required, to cover the floor and bulkhead areas.

Please see below for a typical example of how a kit is produced-this particular kit is for a Fiat Doblo wheelchair conversion.

Step 1

We cut the velour soft trim.

Dimensions are cross checked.

1

2

Step 3

We cut the Tarabus flooring.

3

4

Step 2

We mark and cut the sound insulation.

The pieces are carefully nested to minimise wastage.

Step 4

The pieces are combined and wrapped to form a vehicle kit.

Step 5

The kits are shipped to the vehicle converter.

They then can be installed in the vehicle-no trimming, no waste, and reduced labour time.

Sealants and Weld Cord

We also supply colour matched PU sealants and PVC weld cord for the perfect finish to your Taraplus/Tarabus installation.

Self-adhesive

Our floor coverings with self-adhesive backing will make installation easier and save you time and money

- Ready to bond
- No curing time
- Safer work conditions
- Easy to use

Logo Tiles

Logo tiles are available in a choice of colours, with and without laminated backing, the image shown is for a Wheelchair Logo Tile.
